

Fan Coil Units With DC Brushless Fan Motor

The DC fan coil units are the new energy saving products improved with advanced DC driven technology. The DC fan coil units have advanced technology of high energy efficiency, low noise operation and precision temperature control, so are ideal for hospital, office building, hotels, airports and various other applications.

* Energy Efficiency

The power consumption of DC driven fan coil units can be reduced up to 30% in comparison to corresponding AC type.

* Quiet Operation

Unit noise is 2-5dB(A) lower compared to an AC motor fan coil unit, creating a quiet living environment.

* Constant level of air temperature and humidity

The DC Inverter fan motor adjusts of air flow based on thermal load instantly providing less temperature fluctuation and an improved living environment.
